

## Statistics for the SDGs - indicators for regional priorities

<b>Name of the indicator</b>	<b>1.G.2 Percentage of residential buildings connected to the sewage system</b>
<b>Sustainable Development Goal</b>	Goal 1. No poverty
<b>Priority</b>	Providing housing conditions for the most vulnerable and socially needy groups
<b>Definition</b>	Share of residential buildings connected to the sewage system in the total number of residential buildings.
<b>Unit</b>	percent
<b>Available dimensions</b>	total/urban area/rural area
<b>Methodological explanations</b>	<p><b>A residential building</b> is a building structure where at least half of the total usable area is used for residential purposes. In cases where less than half of the total usable area is used for residential purposes, such a building is classified as non-residential, in accordance with its intended use.</p> <p><b>Sewerage</b> is a complex of sewage facilities: sewage networks, outlets of devices used to introduce sewage into water or the ground, and devices for pre-treatment and purification of sewage, as well as sewage pumping stations.</p>
