Priority	High level of education and professional training of medical staff and their availability to patients
Definition	Number of students of post-secondary schools including colleges of social workers with a medical profile.
Unit	persons
Available dimensions	total
Methodological explanations	A post-secondary school is an educational institution organized on the basis of the curriculum of a post-primary school, enabling people with general secondary education to obtain a diploma confirming vocational qualifications or qualifications in a profession after passing a vocational examination. The education lasts no longer than 2.5 years. Graduates, after passing an external examination, receive a diploma that specifies vocational qualifications at the level of a technician or skilled worker. In statistics, post-secondary schools also include three-year colleges for social service workers.
