

## Statistics for the SDGs - indicators for regional priorities

<b>Name of the indicator</b>	<b>9.D.1 Percentage of individuals using the Internet regularly</b>
<b>Sustainable Development Goal</b>	Goal 9. Industry, innovation and infrastructure
<b>Priority</b>	Increasing the availability of ICT services in the region
<b>Definition</b>	Percentage of persons aged 16-74 using the Internet at least once a week.
<b>Unit</b>	percent
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p><b>Internet</b> - global and public system of interconnected computer networks that use the standardized Internet Protocol Suite (TCP/IP). It is a network of networks that consists of millions of local networks and single computers from all other the world. E-mail, www, FTP and other services are available to use via Internet.</p> <p>Data comes from the survey "Information society indicators", which is a questionnaire based sample survey carried out with use of a face-to face interview, in which participation is voluntary. The survey is conducted in April every year. In accordance with the requirements set up in the European Commission regulations, the survey covers households in the whole country (with at least one person aged 16-74) and all persons aged 16-74 living in those households. The survey excludes persons living in collective accommodation establishments such as student dormitories, employee hostels, social welfare homes, convents, hospitals, barracks, prisons etc. Foreigners may participate in the survey as long as they be able to speak Polish.</p>
